Pedal Zombies
Bikes in Space Volume 3 edited by ELLY BLUE

Praise for previous volumes in the Bikes in Space series:

“This collection of short stories takes you on a far-out romp through dystopian societies where you encounter futuristic bike messengers and witness urban races with life-or-death consequences. And that’s only in the first 10 pages. Bikes in Space Volume II should please fans of feminist lit and science fiction alike—and anyone else who loves a fascinating tale.” – Bicycling Magazine

“Whilst principally about bikes, Bikes in Space also represents what cycling standards for: the freedom and liberation of travel by vehicle that is powered by oneself, as well as the constraints that come from this timeless mode of transport. Elly projects a future inhabited by capable, brilliant, vivacious females, combined with a biking theme which makes it relatable to cyclists and non-cyclists alike.” – Pearrls

The zombie apocalypse will be pedal-powered! In the not-so-distant future, when gasoline is no longer available, humans turn to two-wheeled vehicles to transport goods, seek glory, and defend their remaining communities. In another version of the future, those with the zombie virus are able to escape persecution and feel almost alive again on two wheels. In yet another scenario, bicycles themselves are reanimated and roam the earth. In this third volume of annual feminist bicycle science fiction series Bikes in Space, twelve talented writers bring their diverse visions to this volume: sometimes scary, sometimes spooky, sometimes hilarious, always on two wheels.
